

VB World - Database Architecture Summary

Production PostgreSQL Database Configuration & Schema Reference

[Render PostgreSQL & pgAdmin](#)

1. CLOUD DATABASE DETAILS

DATABASE ENGINE PostgreSQL 16 (Render Cloud)	DATABASE NAME vbworld_db_9th2
HOST / SERVER dpg-da7t39lg1s2s73fakd30-a.singapore-postgres.render.com	PORT & SSL Port: 5432 SSL Mode: Require
BACKEND API SERVICE https://vb-world-api-b7s0.onrender.com	FRONTEND CLIENT (VERCEL) https://vbworld.vercel.app

2. TABLE SCHEMAS & STORED RECORDS

TABLE NAME	PURPOSE	KEY SCHEMA FIELDS	LOADED DATA
User	Admin authentication & login credentials	id , email , password (bcrypt hash), name	1 Admin (admin@framer.com)
HeroConfig	Page-level hero banners and subtitles	id , page , titleHtml , subtitleHtml , webBannerUrl , mobileBannerUrl	7 Pages (home, menu, branches, etc.)
PrivacyPolicyCTA	Global & page-level Call-To-Action sections	id , page , titleHtml , subtitleHtml , contactUsUrl , exploreMenuUrl , imageUrl	8 Sections across all pages
Country	Country grouping for international branches	id , name , overrideCount	5 Countries (India, Dubai, UK, Malaysia, Qatar)
Location	Individual restaurant branches & metadata	id , title , address , phone , time , imageUrl , state , city , countryId (FK)	26 Branches (Chennai, Delhi, London, Dubai, etc.)
MenuCategory	Top-level restaurant menu categories	id , name , width , displayOrder	7 Categories (Breakfast, Coffee, Meals, etc.)
MenuBlock	Rich highlight cards, descriptions & badges	id (FK), imageUrl , subtitle , titleHighlight , titleNormal , badgeTitle , align	7 Highlight Blocks

TABLE NAME	PURPOSE	KEY SCHEMA FIELDS	LOADED DATA
MenuExperience	Time-slot dining experience cards	id , time , title , description , imageUrl , displayOrder	4 Experiences (Morning, Noon, Evening, Midnight)
BranchGalleryImage	Moving marquee image gallery on website	id , imageUrl , row , displayOrder	10 Marquee Images (Row 1 & Row 2)

3. KEY API ENDPOINTS QUERYING THIS DATABASE

- GET /api/branches — Queries all Countries joined with active Locations.
- GET /api/hero?page=home — Retrieves hero banner headline and image for specific page.
- GET /api/menu — Retrieves full menu structure, category blocks, and dining experiences.
- GET /api/branches/gallery — Fetches marquee images sorted by row and display order.
- POST /api/auth/login — Authenticates against user table and returns signed JWT.

4. STORAGE & PROJECT REFERENCES

- SQL Backup File: prisma/dump.sql (Contains complete table DDL & seed inserts).
- Prisma Definition: prisma/schema.prisma (PostgreSQL generator with serverless binary targets).
- Static Images Directory: public/uploads/ (Synced with Render web server).
